Contact Info Available Upon Request

IT professional with over 10 years of experience, currently focused on web development. I really enjoy the creative outlet that software development provides, as well as the challenges and learning opportunities that come with an ever evolving technical landscape.

My varied career history, including positions as senior network engineer and server administrator, gives me a comprehensive understanding of the supporting technologies that make the web work.

KUBRA / Front End Developer
JANUARY 2017 - PRESENT

At KUBRA my responsibilities include the maintenance of older AngularJS codebases, as well as being the lead developer on the React rewrite of the UI for the latest release of our outage mapping solution.

Dynamic Vision / Web Developer
JUNE 2016 - JANUARY 2017

At Dynamic Vision we used the Laravel PHP Framework, along with AngularJS, to build CMS systems for the Healthcare industry.

National Merchants Association / Director of IT
JANUARY 2014 - JUNE 2016

I started at NMA as a PHP developer, and as the company grew from 5 to 150 employees so did my responsibilities. Everything from web development, to network and systems administration. I oversaw the hiring and management of a team of developers and IT professionals that ultimately allowed me to leave and pursue my web development passion.
